

Advanced Placement Credit vs. Regular Instruction Credit

Mary Moore
Marsha Allen

Office of Institutional Research
<http://www.oir.uga.edu>

Motivation

- Who: AP Task Force made up of UGA faculty and administrators working with the Office of Institutional Research.
- What: Study the impact of advanced placement (CB) credit on the academic success of undergraduates.
- Why: Ensure that decisions regarding the awarding of AP credit allow students to experience classroom success.

Scope of Study

- Data was from the UGA/OIR Data Repository (incl. course history, FTF cohorts, test scores)
- The first time freshman (FTF) IPEDS cohorts for 2003 – 2008 were included in this study.
- Course outcomes (grades) for two freshmen course sequences (English and chemistry) were considered.

Nationally, between 2003 and 2008:

- The number of students taking an AP exam increased by 53%.
- The number of AP exams administered increased by 55%.

2007	4,675	3.19	3,160	3.28	1,515	2.99
2008	4,778	3.24	3,440	3.32	1,338	3.03

Analysis

- FTF Cohort Data 2003-2008
- Two Freshman Course Sequences:
 - ENGL1101 and ENGL1102
(English Composition I and II)
 - CHEM1211 and CHEM1212
(Freshman Chemistry I and II)

Variables of Interest

□ Credit Group:

AP – Student earned course credit for the first course of sequence via AP exam.

RI – Student earned course credit for the first course of sequence via regular class instruction.

OT – Student earned course credit for the first course of sequence via other exemption (incl. joint enrollment, departmental exams, IB, etc)

□ Course Outcome:

As measured by **grade** in the second course of the two course sequence

Analysis

Objective: Compare the grade distribution in the 2nd course of a two course sequence between the three credit groups: AP, RI, and OT controlling for cohort year.

Approach: Multinomial response model to evaluate the 3-way contingency table of grade, cohort and credit group.

Average Grade Distribution for CHEM1212 by Credit Group
FTF Cohorts 2003-2008

Summary

Between 2003 and 2008:

- The number of freshmen entering UGA with AP credit increased ~ 34%.
- The number of AP courses taken by FTF freshmen, and the corresponding number of credit hours earned, increased by 73% and 77% respectively.

Summary

- There is a significant difference in the 2nd semester grade distribution for both freshman English and chemistry between students earning 1st semester credit via AP exemption vs. regular classroom instruction.
- Students in the AP credit group on average earn more A's and B's, while the RI credit group earn more B's and C's.

Future Questions:

- Compare course outcomes between AP and non-AP students for core courses in other disciplines: ie, math, history, foreign languages.
- Evaluate the “cut-scores” currently used to award AP credit.

Future Questions

Compare AP and non-AP students on:

- ❑ The number of semester hours taken
- ❑ Time to degree
- ❑ Number of students pursuing a dual degree and/or multiple major
- ❑ Ability to retain HOPE scholarship
- ❑ Other???
